

Commercial Land Development Services

About Us

Cumby & Fair has extensive Civil/Site Engineering experience and have completed countless projects for private commercial and public facilities. Some of these projects include:

- * Shopping centers
- * Restaurants
- * Fast food restaurants
- * Schools
- * Parks
- * Fire stations
- * Transportation projects

Our firm has extensive experience in site planning, drainage design, and permitting with SWFWMD, EPC, ACOE, FDEP, FDOT, EPA, water system design, sewer system design, and access management design as required in the Civil / Site development process.

Cumby & Fair is able to far exceed services that are normally provided for commercial developments. On countless occasions we have provided one or a combination of the following services as part of our "full service" promise:

- * Site planning and master planning
- * Reclaimed water distribution systems
- * Lift stations and wastewater treatment plants
- * Access management design
- * Parks design
- * Bike path and boardwalk design
- * Collector and major arterial roadway design
