

Construction Surveying Services

About Us

Construction surveying has long been a mainstay at Cumbe & Fair, Inc. As a full-service engineering and surveying firm, we provide construction staking for most of our internally designed commercial, residential and private roadway engineering projects. Cumbe & Fair has provided construction surveying services for countless projects that were designed by other engineering firms. We also offer construction surveying services for road contractors as well as construction control and checking services for CEI-type projects.

Cumbe & Fair has provided construction surveying services for pipelines, both direct bury and directional drilling, including high-pressure gas main.

Construction Surveying Services

Construction Surveying Services would include construction layout of:

- * Infrastructure Improvements ie: water, sewer, storm, roads, ponds, etc.
